## AGENCY FOR POSTPRODUCTION

### reference

VCC GmbH - Agency for Postproduction is one of the leading Postproduction houses in Germany.

When the big project Sony Ericsson „Showtime“ was confirmed, there was no question for me which character developer should be responsible for not only creating a robot, but also leading the whole 3D and 2D comic animation team on this project. I called Tim Weimann.

Tim developed an outstanding robot which he presented to the director. The director, Eric Hillenbrand, trusted him completely, as the layouts looked great from the first moment on. But Tim not only created and animated the robot, he also supervised in cooperation with the director the 3D artists responsible for the texturing as well as the comic artist.

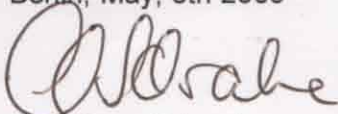

There was no moment during the whole six-week project when I did not feel completely comfortable because I knew I was working with a pro. Tim is a perfectionist with great work ethics and extremely creative. He is also one of the most down-to-earth and uncomplicated artists I ever got to know.

The director was enthusiastic and the agency and client had no changes on the robot.

We thank Tim for his dedication. Whenever we need a 3D artist in the future, we hope to be able to work with Tim again.

If you have any questions about Tim and his work performance, please do not hesitate to call me.
